Jack West Adjustable Stocks Goes Scholastic

Arlington, Oregon, May 29, 2007 – Jack West Adjustable Stocks is proud to announce the launch of a national program offering all scholastic clay sport athletes the opportunity to obtain a Jack West Adjustable Stock through a special discount program. Instructions and information are posted at www.jwstocks.com and www.centershotsports.com.

Jack West, President of Jack West Adjustable Stocks realized the need to provide scholastic teams with the necessary equipment to give these young athletes the winning edge. Jack said, “Jack West Adjustable Stocks is proud to support all of the young men and women in the clay target shooting community. Shooting programs throughout the nation help to develop core character, leadership and safety awareness, which Jack West strongly supports.”

Jack West is offering this program to help all young athletes reach their goals with proper equipment. The coordinator of this program was Marvin Spinks of Center Shot Sports. Spinks said. “In coaching young clay target athletes, gun fit is paramount. It is difficult for young athletes to maintain proper head position with the angled drop of a field stock. The Jack West competition adjustable parallel comb stock will help athletes keep the same head to barrel relationship throughout the entire shot process.”

Jack West can set the standard pad at any length of pull (LOP) needed. The composite fits the Remington shotgun family models 1100, 1187 and 870, 12 gauge. The buttstock has 1 1/2" x 1 1/2" drop at lowest point and the parallel adjustable comb will raise 3/8" and has 3/16" side to side movement right or left. This stock also has a right and left palm swell, standard 14 3/8 LOP and extended pistol grip cap. One gun will work in the field and play all games, sporting clays, skeet and trap.

Jack West’s mission is to give every athlete the opportunity to reach his or her goals through competition equipment.
